## MOBILE FORENSIC SUITE

AI-Powered Mobile Forensics

**Chitragupt** is a state-of-the-art mobile forensic suite designed to meet the increasing demands of digital investigations. With its advanced capabilities, Chitragupt empowers security and investigative agencies to streamline the process of extracting, analyzing, and reporting mobile device data.

Whether on-site in the field or at secure locations, its lightweight, portable design ensures investigations can be conducted efficiently anywhere. Chitragupt is purpose-built to simplify the complexities of modern mobile forensics while safeguarding the integrity of evidence with secure, tamper-proof storage.

### Where Chitragupt Shines

National security agencies

Defense organizations

LEAs-  
Law enforcement agencies

Government bodies

Corporate organizations

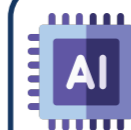

PORTABLE  
POWERFUL  
PRECISE

Chitragupt generates detailed, customizable forensic reports tailored for use in legal proceedings, internal audits, or strategic decision-making. Its reporting tools are designed to meet the highest standards of accuracy and clarity, ensuring credibility in investigations.

### Cutting-Edge Capabilities

#### AI-Powered Data Analysis

Leverages artificial intelligence for deep data insights.

#### Universal Device Compatibility

Supports a wide range of mobile operating systems and devices.

#### Instant Data Extraction

Quickly retrieves data from various mobile devices.

#### Quick Deployment & Analysis

Ready for rapid investigations on-site or in secure locations.

#### Secure Evidence Management

Ensures tamper-proof storage to maintain the integrity of evidence.
